*Integrity - Service - Excellence*

## **RC-135V/W RIVET JOINT**

**Capt Christopher Costello**

**38 RS/DOW**

**8 SEP 17**

**Version 1**

---

# 55<sup>th</sup> WG Chain of Command

*Breaking Barriers ... Since 1947*

# 55<sup>th</sup> WG Organization

# Operations Around the Globe

*Breaking Barriers ... Since 1947*

# RC-135 QUICK LOOK

- **CAPABILITY**: Self-contained, standoff, medium-altitude SIGINT and MASINT collection systems
- Only “heavy-lift” airborne SIGINT platform with EP-3 divestiture
- Robust communications and onboard PED key to A2AD and contested operations
- UK RJ - Highly successful FMS case
- **CORE STRENGTHS**:
  - Innovative Airmen
  - Responsive Technology
  - Agile Employment

***“ISR systems need to be...developed in a way that makes ISR agile and responsive enough to support global and theater ISR in a seamless manner”  
– Air Force Strategy: America’s Air Force: A Call to the Future***

# RC-135 TAKEAWAYS

---

- **Responsive and Agile ISR**
  - Proven capability that is globally deployable (<24hrs)
  - Continuously integrated new technology
- Enables the **Decision Advantage** in joint fight
  - Immediate assessment of kinetic and non-kinetic effects
- Delivers **Foundational Intelligence** for national leaders and Department of Defense acquisition
  - I&W for strategic threats
  - DoD's only airborne scientific & technical ELINT collector – fills critical IMD gaps

# RJ OPERATIONAL STATS

## RC-135V/W RIVET JOINT

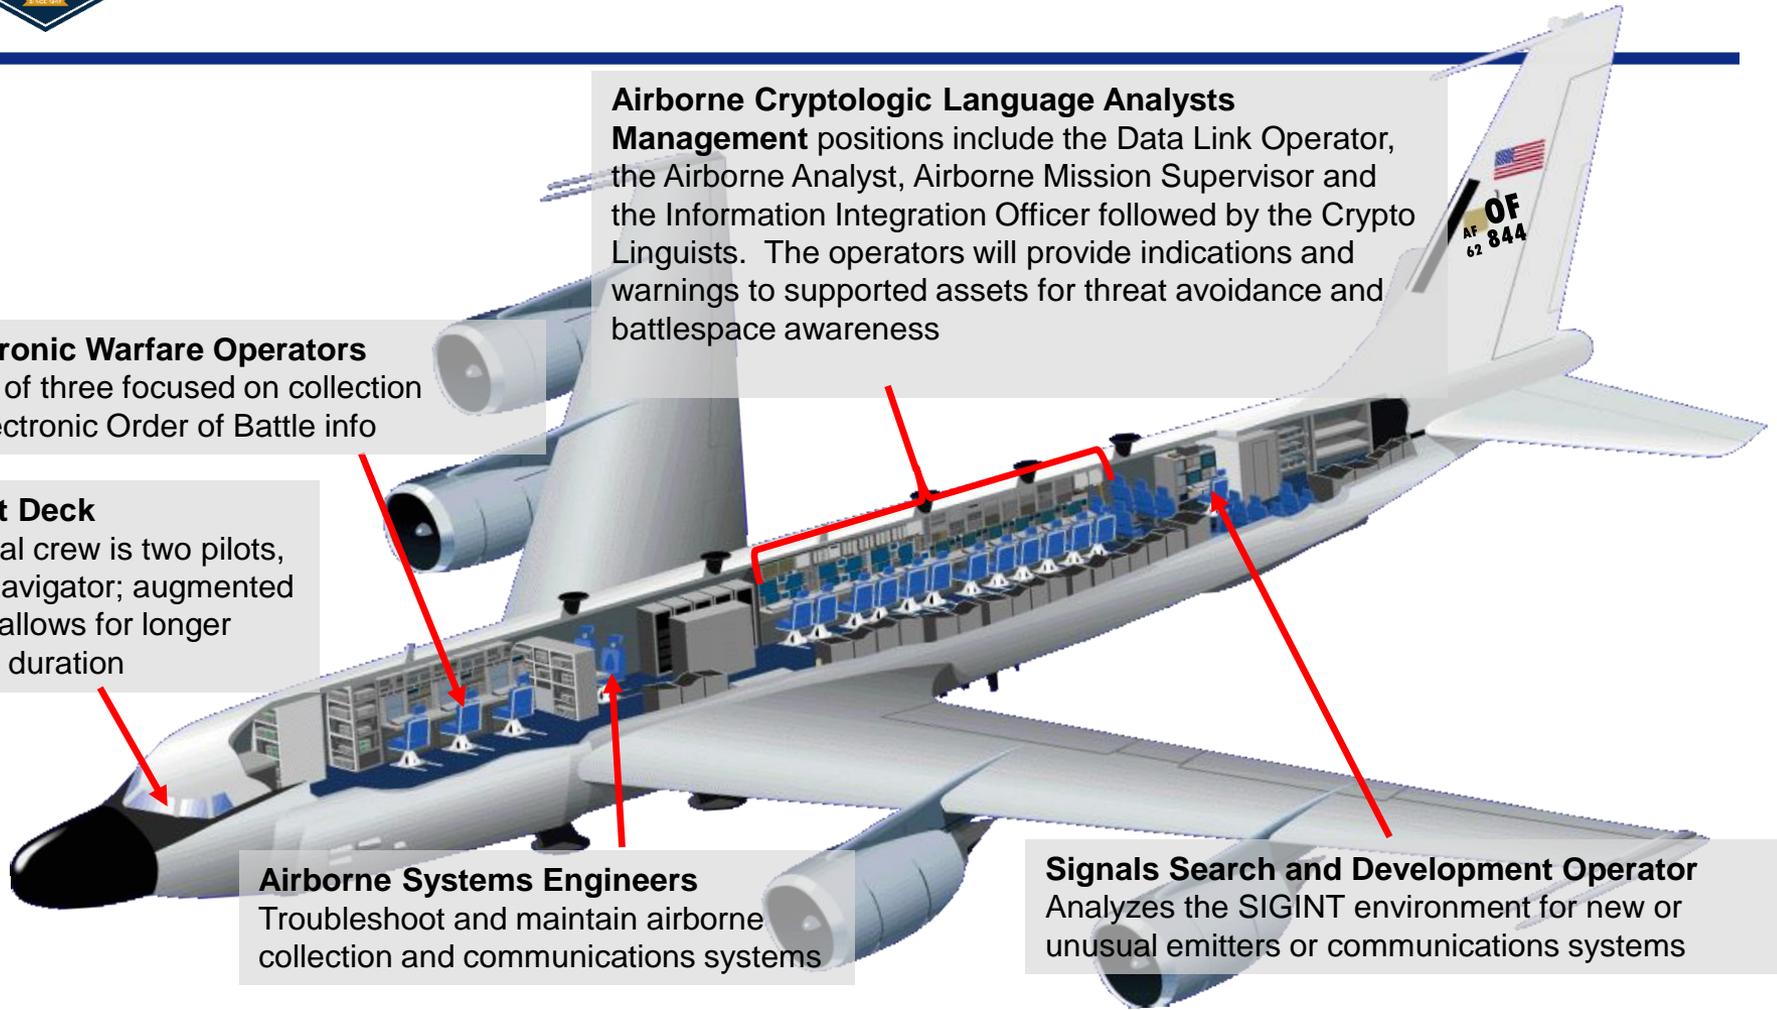

### 2015 Operational Stats:

**AFRICOM: 23 sorties, 151.2 hrs**  
**CENTCOM: 422 sorties, 5,131.5 hrs**  
**EUCOM: 157 sorties, 1,204.7 hrs**  
**NORTHCOM: 17 sorties, 180.8 hrs**  
**PACOM: 157 sorties, 1,312.4 hrs**  
**SOUTHCOM: 41 sorties, 418.4 hrs**  
**TOTAL: 817 sorties, 8399 hrs**

# RIVET JOINT Overview

**Airborne Cryptologic Language Analysts Management** positions include the Data Link Operator, the Airborne Analyst, Airborne Mission Supervisor and the Information Integration Officer followed by the Crypto Linguists. The operators will provide indications and warnings to supported assets for threat avoidance and battlespace awareness

**Electronic Warfare Operators**  
Crew of three focused on collection of Electronic Order of Battle info

**Flight Deck**  
Normal crew is two pilots, one navigator; augmented crew allows for longer sortie duration

**Airborne Systems Engineers**  
Troubleshoot and maintain airborne collection and communications systems

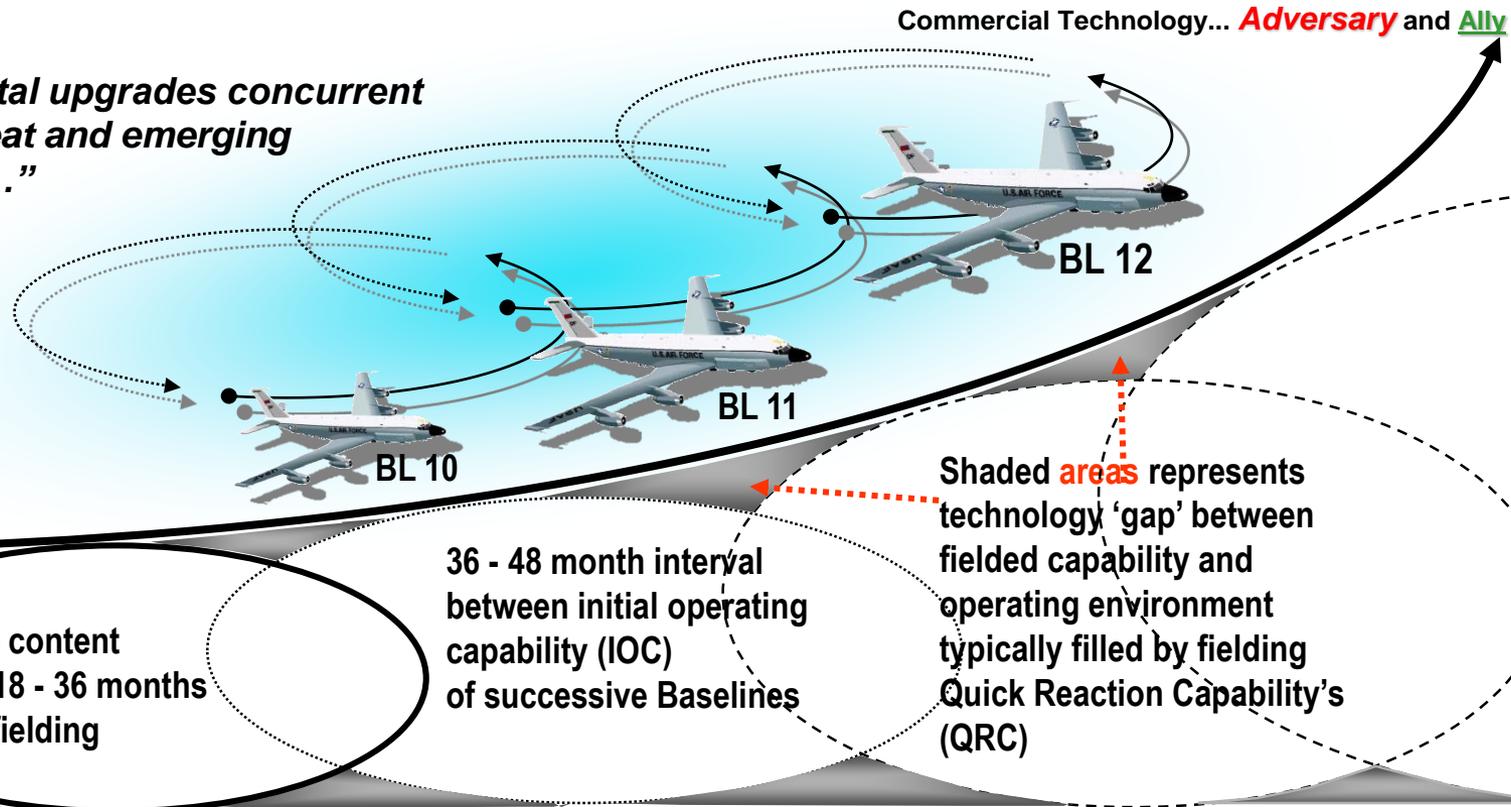

**Signals Search and Development Operator**  
Analyzes the SIGINT environment for new or unusual emitters or communications systems

**(U) RC-135 internal PED ensures critical intelligence to warfighter**

# RC-135 Baseline Improvements

*“...incremental upgrades concurrent with the threat and emerging technology...”*

*“The Air Force shall continue mission system enhancements of RC-135 to ensure these assets maintain the capability to meet emerging operational requirements.”*

*--USD(I) Defense Intelligence Guidance*

*Breaking Barriers .. Since 1947*

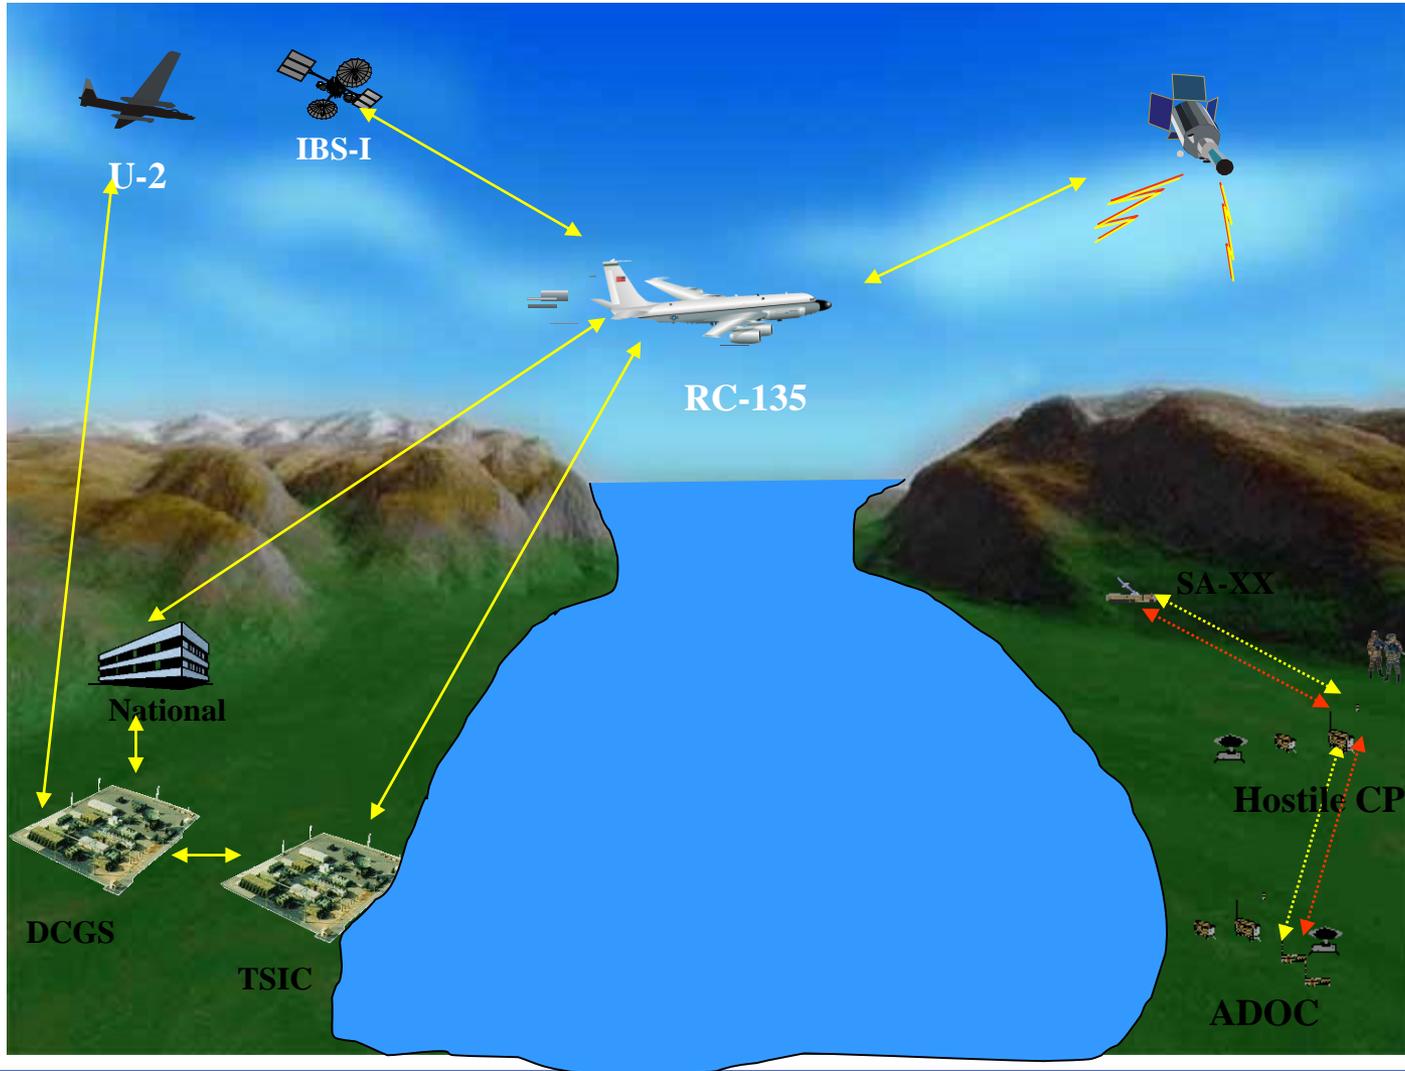

# ***Sensitive Reconnaissance Operations (SRO)***

---

- **Under direction of National Agencies**
  - **Intercept, Identify and Locate Sources**
  - **Purpose: Strategic Reconnaissance**
  
- **Source of Data for Future Planning**
  - **Defensive Systems improvements**
  - **Capabilities (Strengths & Weaknesses)**
  - **Threat Avoidance planning**

# Sensitive Reconnaissance Operations (SRO)

*Breaking Barriers ... Since 1947*

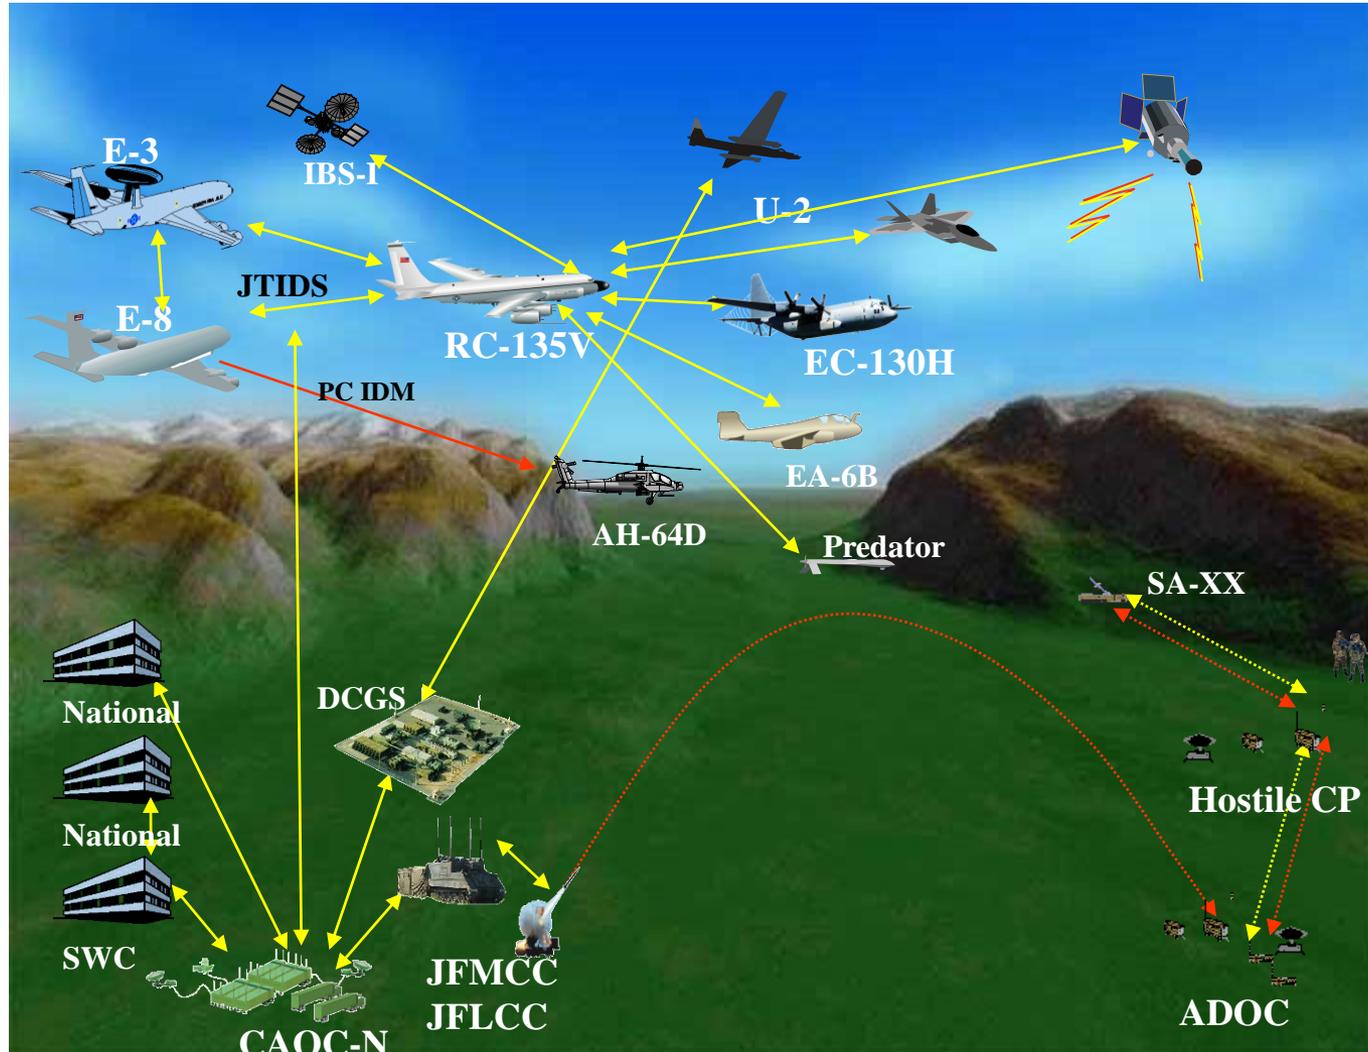

# ***Electronic Warfare Support (ES)***

---

- **Under Control of Operational Commander**
  - **Intercept, Identify and Locate Sources**
  - **Purpose: Immediate Threat Recognition**
  
- **Source of Info for Immediate Decisions**
  - **Electronic Warfare**
  - **Targeting**
  - **Threat Avoidance**

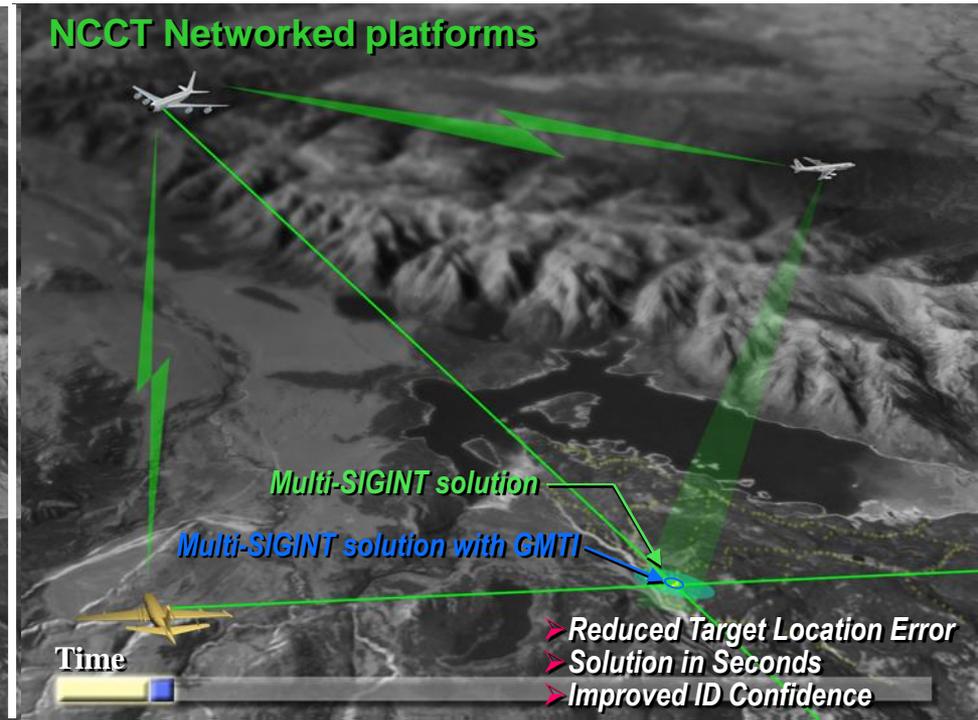

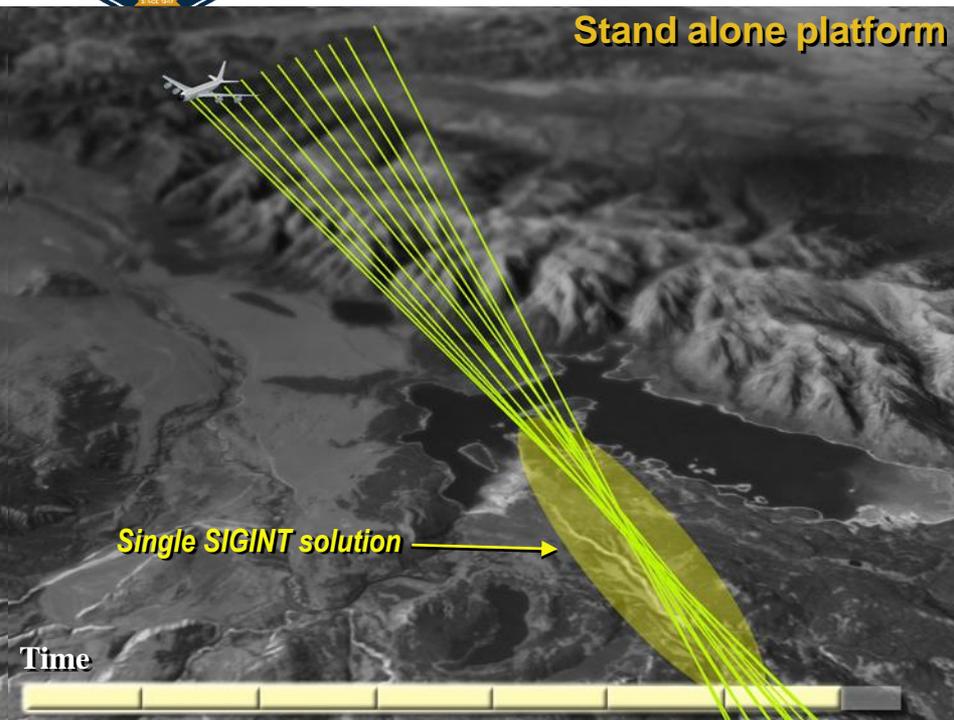

# Electronic Warfare Support (ES)

*Breaking Barriers ... Since 1947*

# NCCT Cross Cueing

## Stand alone platforms

- Tens of minutes to detect and recognize
- Coarse location, if target stays on the air

## Networked platforms

- Seconds to a few minutes to detect, ID and locate
- Accurate location, even if target is short up-time

## NCCT Results

- Fuses multi-platform, multi-INT, multi-security level data to provide tracks w/ pedigree (M2M... Man On the Loop)
- Simultaneously focuses sensors on common targets to get very accurate information in real-time
- First M2M interface between tactical and national ISR

# Challenges

---

- Data coming into RJ > data going out and being processed
- NCCT crossflow
  - Integration with other platforms for cooperative geolocation
- Providing ES to the warfighter in an A2AD situation
