

Women's Health Clinic 402-232-2273, ext. 342

The clinic is open Monday – Friday 0730-1630. We are closed on the third Thursday each month from 1300-1630 for training.

Gynecology

The Women's Health Clinic provides quality nursing care to eligible women (adolescent to geriatric) throughout the childbearing and menopausal cycle. We strive to teach our patients and their families positive health practices through an understanding of available community and facility resources. We provide preventive health care and the maintenance of a healthy life style in an organized, safe, and caring environment. Care includes, but is not limited to:

- Birth Control Counseling
- Cancer screening
- Dysplasia treatment
- Infertility Work-ups
- Mammography Referrals
- OB/GYN preventive medicine
- Patient/family education
- Patient/family OB/GYN concerns
- Sexually Transmitted Infection Treatment

Women with a positive home pregnancy test or more than 5 days late for their cycle can walk-in to their PCM clinic to request a pregnancy test – no referral is needed from the clinic. Results will be received by PCM team, & patients will receive a call with results from their nurse. Active Duty patients must notify public health within 24 hours of positive result. At the time of notification your team nurse will schedule you for the OB Orientation class and order prenatal vitamins.

Obstetrics

OB Orientation – Group orientation held every Tuesday at 0900 in the third floor classroom at the Clinic. You must schedule this class through the appointment line or Women's Health Clinic. This class is to inform you of the OB care and services provided by the 55th Medical Group and our community partners, and to provide the information you need to choose whether you wish to receive care through the Pink Team (Women's Health) or the Blue Team (Family Medicine) throughout your pregnancy.
